About This Game

The Botanist is an optimistic game about growing plants and becoming independent, where every word in the world is a seed that grows a unique plant.

This game is a lot more fun than I expected it to be! It is casual and kind of repetitive in a relaxing way. I finished it in 6 hours, but I am pretty sure I will play it again. I haven't seen all the plants yet! I do hope more plants and pots, and new ranks/goals, are added in the future.. This game is a lot more fun than I expected it to be! It is casual and kind of repetitive in a relaxing way. I finished it in 6 hours, but I am pretty sure I will play it again. I haven't seen all the plants yet! I do hope more plants and pots, and new ranks/goals, are added in the future.. I'm definitely having fun discovering the different plants. The art style is simple and cute and I enjoy the overall atmosphere. The only downside is when my mouse disappears from the screen- even after I hit esc to do the quick fix there are still issues. Specifically I mean that I am no longer able to select my seeds even after this quick fix. I would also love if there was a separate slider for music volume vs ambient sounds.. Really nice game. Relaxing soundtrack, and it's a lot of fun seeing what will grow from your chosen words. The plant requests by people are great as well, really satisfying to complete player requests.. Riddled with bugs. Repetitive plants w/ just different colors. Identical requests to fulfill day after day. Music is bad. You can hardly see the mouse pointer since it is white over white/light colors. Interesting concept with the ability to name any seeds you buy and see what random plant comes out - but that's it. Not at all worth \$7. Buy on sale for \$2 or less. Might become worth it if the developer fixes bugs, performance issues, and puts more variety into requests and plants. I'm only continuing to play it to finish achievement whoring. Viridi is much better.. This is a great game, and it's very relaxing, especially to someone like me that suffers from generalized anxiety disorder. Sometimes, it's good to appreciate a game that you don't have time-limits, enemies, etc. and just have a fun time trying out new plants and fulfilling requests. There are a few bugs within the game, thankfully nothing game-breaking, and the majority of these will most likely be fixed with patches in time.. Riddled with bugs. Repetitive plants w/ just different colors. Identical requests to fulfill day after day. Music is bad. You can hardly see the mouse pointer since it is white over white/light colors. Interesting concept with the ability to name any seeds you buy and see what random plant comes out - but that's it. Not at all worth \$7. Buy on sale for \$2 or less. Might become worth it if the developer fixes bugs, performance issues, and puts more variety into requests and plants. I'm only continuing to play it to finish achievement whoring. Viridi is much better.
